

User manual Using heartbeat sensor

The first thing to do is wrap the entire set with the provided electric band around your wrist.

Second step

Take the heartbeat sensor out of the electric band

Step three:

Take the heartbeat sensor to your finger and wrap it around so it stays still

Step 4:

Plug in the usb cable/ or battery pack.

Step 5: check the oled screen for BPM, if the BPM is 0 or 255 it means its not connected correctly or its still waiting to connect.

Step 6:

If the buzzer keeps making noise every few seconds it means wifi is not connected and you're bpm won't be uploaded!
